

4 Courses

**Classical Cryptosystems and
Core Concepts**

**Mathematical Foundations
for Cryptography**

Symmetric Cryptography

**Asymmetric Cryptography
and Key Management**

Nov 15, 2019

Muhammad Amin Nadim

has successfully completed the online, non-credit Specialization

Introduction to Applied Cryptography

Cryptography is an essential component of cybersecurity. The need to protect sensitive information and ensure the integrity of industrial control processes has placed a premium on cybersecurity skills in today's information technology market. Demand for cybersecurity jobs is expected to rise 6 million globally by 2019, with a projected shortfall of 1.5 million, according to Symantec, the world's largest security software vendor. According to Forbes, the cybersecurity market is expected to grow from \$75 billion in 2015 to \$170 billion by 2020.

William Bahn, Ph.D.
Adjunct Professor
University of Colorado,
Colorado Springs

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
