Cybersecurity Capstone Project

Oct 29, 2019

Muhammad Amin Nadim

has successfully completed the online, non-credit Specialization

Cybersecurity

The Cybersecurity Specialization covers the fundamental concepts underlying the construction of secure systems, from the hardware to the software to the human-computer interface, with the use of cryptography to secure interactions. These concepts are illustrated with examples drawn from modern practice, and augmented with hands-on exercises involving relevant tools and techniques. Successful participants will develop a way of thinking that is security-oriented, better understanding how to think about adversaries and how to build systems that defend against them.

I all our get the

Jennifer Golbeck, Ph.D., Professor Michael Hicks, Jonathan Katz, PhD, Gang Qu, Professor

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
